

Jacob Tippet

- Website name: Elden Rings best builds through all levels
- Description: It'll be a website detailing the best Elden Ring builds in extreme detail including every item and level that needs to be put in. It will also include images of each item, as well as the location of each item.
- Different page names:
 - Strength build: Will go into detail for what items are needed for a good strength build
 - Dexterity build: Will go into detail for what items are needed for a good dexterity build
 - Magic build: Will go into detail for what items are needed for a good magic build
 - Arcane build: Will go into detail for what items are needed for a good arcane build
 - Faith build: Will go into detail for what items are needed for a good faith build
 - Intelligence build: Will go into detail for what items are needed for a good faith build
 - Also on each page with a written guide there will be a link for each item that takes you to a video that shows where to get the item
- I will need to learn how to put videos into my webpage. I would also like to learn how to put animations in my website to make it flow and look better. The last thing I would like to learn would be how to put slideshows in to better showcase items that you would need.
